

# Compact and Powerful Audio Mixer Delivers a More Streamlined Workflow

GlobeCaster's AP-100 eliminates the need for an expensive outboard audio switcher.

The AP-100 is a much-requested enhancement to GlobeCaster. The low-cost AP-100 allows you to get more power out of the on-board audio mixer in your GlobeCaster by controlling it with this compact and powerful tactile interface.

## AP-100 Features Includes:

**Eight Motorized Faders** — Smooth motorized faders that accept parameter automation feedback from GlobeCaster.

**Plug and Play** – The AP-100 is fully integrated with the software audio GUI that users already know. GlobeCaster software drivers integrate AP-100 with the Audio Panel in the Switcher Application (panel controls software / software controls panel)

**No Latency** – The AP-100 is controlled via a unique and simple USB Midi connection that is free from any latency.

**Professional Quality** – Rugged construction and high-quality components deliver long life and durability.

Audio connections are made directly to GlobeCaster, yet controlled via the AP-100. Your desktop will be cleaner; your audio mixes more fluid — and your workflow streamlined.

## Technical Specifications:

<b>MIDI Interface:</b>	5-pin DIN connectors IN, OUT A, OUT B/THRU
<b>Controls:</b>	8 motorized 100 mm faders, 8 variable push encoders
<b>Keys:</b>	20 Keys, 10 System Keys
<b>Power Supply:</b>	85 – 250 V-, 50-60 Hz
<b>Consumption:</b>	max 10W
<b>Fuse:</b>	T 1 A H
<b>Mains Connection:</b>	Standard IEC
<b>Dimensions:</b>	13" x 4" x 11 4/5"
<b>Weight:</b>	5.75 pounds

## AP-100 for GlobeCaster

\*Require GC Software Version 3.3
